KEY TAKEAWAYS

- Multifamily demand remains robust.** In Q1 2025, nearly 102,000 units were absorbed, a 12% increase over Q1 2024. For context, prior to the pandemic, the market averaged around 73,000 net move-ins. The multifamily sector continues to benefit from steady household formation and affordability challenges in the for-sale market.
- Demand outpaced supply for the first time since 2021.** New deliveries in the first quarter totaled 95,000 units, down 25% compared to the first quarter of 2024. Supply-side pressure will continue to abate, with the construction pipeline now 34% lower than a year ago, returning to 2018 levels.
- Rent growth holds steady.** With a resilient economy thus far, rent growth has managed to stay positive, growing by 2% year-over-year (YOY) in Q1 2025—within range of the historical average which is 3-3.5%. Economic uncertainty measures were spiking as of this writing, but assuming the economy can hold up, the outlook for rent growth remains positive.

DEMAND MOMENTUM CONTINUED INTO Q1 2025

On the heels of the second strongest year for multifamily absorption since the turn of the century, the momentum continued in Q1 2025. More than 100,000 units were absorbed, 12% higher than a year prior, and nearly 40% stronger than the pre-pandemic (2017-2019) first quarter average.

The South continues to see the strongest demand in the nation, driven by [outsized population growth](#). The region accounted for 53% of nationwide move-ins in the first quarter. Dallas/Ft. Worth and Phoenix were the standouts this quarter, leading the nation in absorption with 7,500 and 5,100 units, respectively. On a percentage basis, Sarasota and Huntsville each absorbed more than 2% of their inventory in the first quarter. These two metros also have the highest vacancy in the U.S., so the strong demand observed in Q1 is perhaps kickstarting the recovery in fundamentals.

The outlook for demand growth moving forward is understandably cloudy, given the economic uncertainty. Multifamily demand has proven resilient through economic cycles (more later in the outlook section), and the structural shortage of housing will remain a key theme moving forward.

LARGEST YOY RENT GROWTH

LACK OF CONSTRUCTION STARTS CAUGHT UP TO THE MARKET

The shrinking multifamily construction pipeline has been the proverbial “light at the end of the tunnel” for investors as the rate-hiking cycle took off in 2022. Those days seemed far off in 2022, as the market grappled with the largest wave of deliveries since the 1970s. But the long-awaited pullback has arrived; new deliveries have declined by 20% for two consecutive quarters to the lowest levels since late 2022. Vacancies, in turn, shifted down by 10 basis points (bps)—a relatively nominal decline but a notable one given the increase in vacancy over the past few years.

Nationally, just 545,000 units remain under construction, the lowest figure since 2018. And with trailing 12-month construction starts down 36% YOY—and likely to come down further given the economic uncertainty—the pipeline is unlikely to fill up any time soon. That will leave plenty of room for further recovery in fundamentals as long as demand growth remains positive.

Texas continues to lead the nation in the pullback in construction. Dallas/Ft. Worth, Austin, and Houston lead the nation in declining pipelines over the past year, with nearly 60,000 fewer units under construction today compared to a year ago. Atlanta (-17,000 units) and Phoenix (-16,000 units) also saw significant declines in their pipelines over the past year.

RENT GROWTH CONTINUES TO SHOW MILD IMPROVEMENT

Rent growth has shown consistent improvement from the third quarter of 2023, when it bottomed out below 1.5%. Since then, each quarter has shown some, albeit sometimes imperceptible, improvement. Rounded figures place the market at around 2% growth for the past few quarters, but it’s jumped from 1.97% to 1.99% to now posting 2.02% YOY growth. At the same time, competition for renters remains fierce, with vacancy rates still well above their historical averages. The widespread use of concessions continues to suppress effective rent growth. On average, effective rents increased by just over 1%, about half the growth seen in asking rents.

Across markets, asking rent growth continues to outperform in the Northeast (3.2% YOY) and Midwest (3.9% YOY). Northeast Arkansas, which led the nation at 5.9% rent growth, and San Jose, with a 4.2% YOY increase, were the only markets outside the Northeast or Midwest to rank among the top 15. The latter points to a burgeoning storyline: both San Jose and San Francisco (3.7% YOY) are finally showing signs of recovery after relatively minimal rent growth over the past five years.

On the other hand, rent declines are relatively concentrated to just two supply-heavy markets. Rent growth is down 2.7% in Austin and 2.2% in Denver as the markets continue to work through robust deliveries. The former saw more than 8.5% of its inventory deliver over the last year, while Denver saw nearly 6.5% of its inventory come to market in the past 12 months.

OUTLOOK

- Recent shifts in U.S. policy have generated greater levels of uncertainty, which is weighing on consumer confidence. The labor market has shown resilience thus far, but consumer confidence plays an important role in household formation, which could weigh on multifamily demand. It’s worth noting, however, that over the last 25 years, a period that includes three recessions, the multifamily sector has demonstrated remarkable resilience. During this time, there has been only one quarter of negative net absorption, and even then, it was a minor decline of approximately 2,000 units.
- The Sunbelt is picking up steam. While construction activity across the southern U.S. has been falling in aggregate since early 2023, with less than 5% of the market’s inventory currently under construction—the second lowest among all regions—demand continues to outpace supply. If this strong demand persists, rent growth, which has been ticking up consistently since 2024 (now at 1.6% YOY, double the 0.8% recorded in Q1 2024), will continue to build momentum heading into the second half of the year.

METHODOLOGY

Cushman & Wakefield’s quarterly figures are derived from a variety of data sources, including third-party data sources, and its own proprietary set of managed properties, totaling more than 180,000 units nationally. The market statistics are calculated from CoStar’s database, filtering for properties with more than 50 units in the top 90 metros nationally. The figures provided for the current quarter are preliminary, and all information contained in the report is subject to correction of errors and revisions based on additional data received.

EXPLANATION OF TERMS

- Total Inventory:** The total number of units rented or vacant in a given market.
- Overall Vacancy Rate:** The number of vacant units expressed as a percentage of total inventory.
- Stabilized Vacancy Rate:** The number of vacant units in buildings older than 18 months old or that have reached 90% occupancy within 18 months of delivering, expressed as a percentage of total inventory.
- Absorption:** The net change in occupied units between two points in time.
- Overall Asking Rents:** Average asking rents weighted by the number of units within a building across all classes.

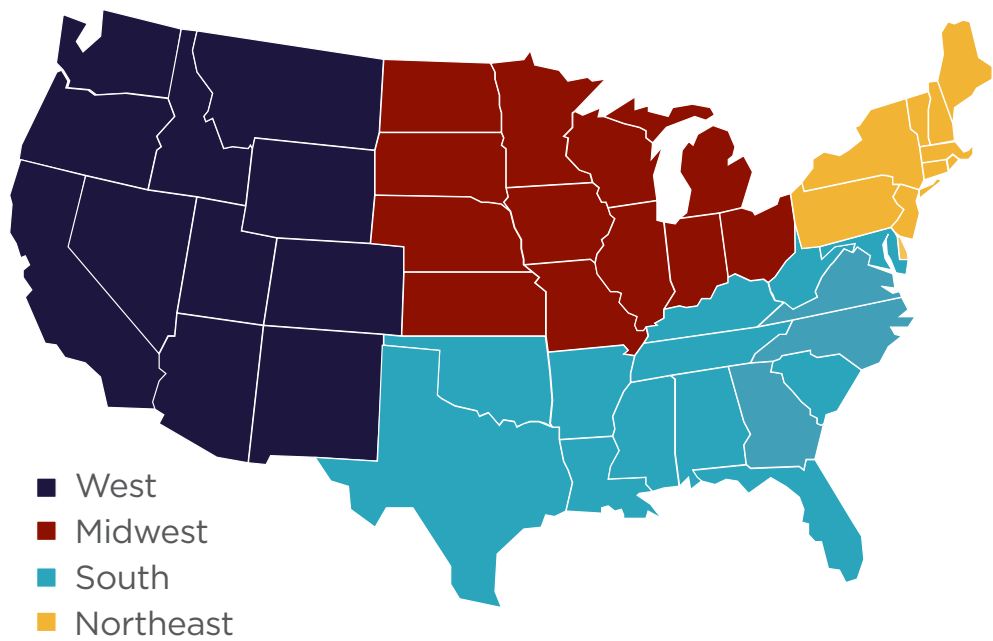

A CUSHMAN & WAKEFIELD RESEARCH PUBLICATION

Cushman & Wakefield (NYSE: CWK) is a leading global commercial real estate services firm for property owners and occupiers with approximately 52,000 employees in nearly 400 offices and 60 countries. In 2024, the firm reported revenue of \$9.4 billion across its core service lines of Services, Leasing, Capital markets, and Valuation and other. Built around the belief that Better never settles, the firm receives numerous industry and business accolades for its award-winning culture.
