GENERAL COMMENTS

The property is owned by the Children's Aid Foundation and was most recently occupied by the organization. The building is currently vacant and presents an excellent opportunity for immediate occupancy and/or repositioning. The property is zoned Institutional which generally permits a wide range of potential uses. A site-specific exception is currently in place that limits certain uses; however, discussions with a planning consultant are underway to explore a pathway toward removing this exception and/or a change of zoning. Based on preliminary consultations, accommodating alternative on-site uses appears to be achievable, provided adequate time for plan submission and to navigate the approval process. For additional details, please refer to the zoning information page.
