Remaking a Classic

2001 W. Morehead Open for Charlotte, Since 1955

2001 W. Morehead functioned originally as the factory for Mitchum Quality Snacks. Mitchum was a snack food company that specialized in producing high-quality potato chips. At its height, the factory produced 2,000 pounds of chips each hour, bagging and distributing them to stores across the country. More recently, it was home to The Potato Sack, a flea market meets pop-up showroom concept. In continued celebration of its snack food past, the two buildings that sit on the property have been named Salt and Vinegar.
